--- SEE OFFICE ACTION ON THE FOLLOWING PAGES ---

Art Unit: 3736

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/8/00 has been entered.

2. The amendment filed 12/8/00 is improper. The amendment to the specification does not include underlining of the additions; also the new claims 28-33 lack the proper underlining. See M.P.E.P. 1453.

3. In view of the fact that additional errors in the original patent have been corrected through amendments to the claims, a new/supplemental oath or declaration complying with 37 CFR 1.175 (a) is required.

4. The original patent, or an affidavit or declaration as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

5. Claims 10 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 still fails to further define the device. In claim 10, line 8, "in close proximity" is indefinite in that it is unclear what the limitations of such language are.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3736

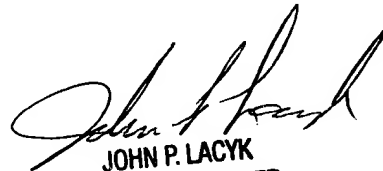

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 10-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Weinstein et al.

Weinstein et al discloses a device that positions a radioactive source within a stenosed area where a shielding means is "repositioned" to expose the radioactive source for the treatment and the device and the radioactive source are withdrawn after treatment.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Lacyk whose telephone number is (703) 308-2995.
